## ANNOUNCEMENT FROM AVTECH.

Recently, there have been rumors in which we find hackers are targeting security firms again and AVTECH is believed to be one of the targeted groups. Hereby, AVTECH would like to take precautionary measures to advise all our product users (IP camera, NVR, DVR) to watch out for any abnormal behaviors of your machine.

This is especially important for clients who use DDNS services / static IP and not our P2P EaZy networking service. Please make sure for users that that starting from June 27th, 2018:

- 1. Make a change of port number. Don't use port 80 that is the standard port. Please change to another port in another range.
- 2. Make a change on your current admin user account name and password. Don't use standard that is Admin.
- Delete the default "admin" account on your recorders. Here is a video link to guide you. <u>https://youtu.be/o14ai8GZDiQ</u> or check the guide in the next page.
- 4. For new installation job, we recommend to choose EaZy Networking service and always change the admin, password and port. We will make a firmware that will force you to change this in the future.

## See next page how to change admin user.

• Step 1: Login to the admin account. (Default: admin)

• Step 2: Right click mouse. Select system menu.

			SYS	TIEM			
CCOUNT	& USER LIS	ST # GROU	P				
TOOLS SYSTEMENTO ONLINE BACKUD DATA	USERIN/AME admin			GROU SUPER	VISOR
