# 1. OVERVIEW

Video viewer, the free Central Management System (CMS) software, offers a powerful and integrated solution to manage and monitor systematically; each CMS server can manage up to 16 devices simultaneously.

Besides, the friendly graphical interface for the advanced management, intelligent motion detection, flexible scheduled recording and quick event search makes this CMS software excellent for every security demand.

## 1.1 Product Features

- Allows multiplex operations (live view, record, playback, backup, and network) equipped with intelligent motion detection function
- Pre-and post-event recording to capture valid evidence
- Full record log and graphical design for quick event search
- PTZ camera control

## 1.2 Before Using the Software

Before using Video Viewer, please make sure:

- 1) You have installed the software from the supplied CD or the Internet, and its version is 0119 or later.
- 2) You have configured the network settings on your MAC, and the network connection works properly.
  - To know how to install this software on your MAC, please refer to “2.1 Install the Software” at page 2
  - To know how to use this software, please refer to “3. CONTROL PANEL ” at page 4

## 2. INSTALLATION

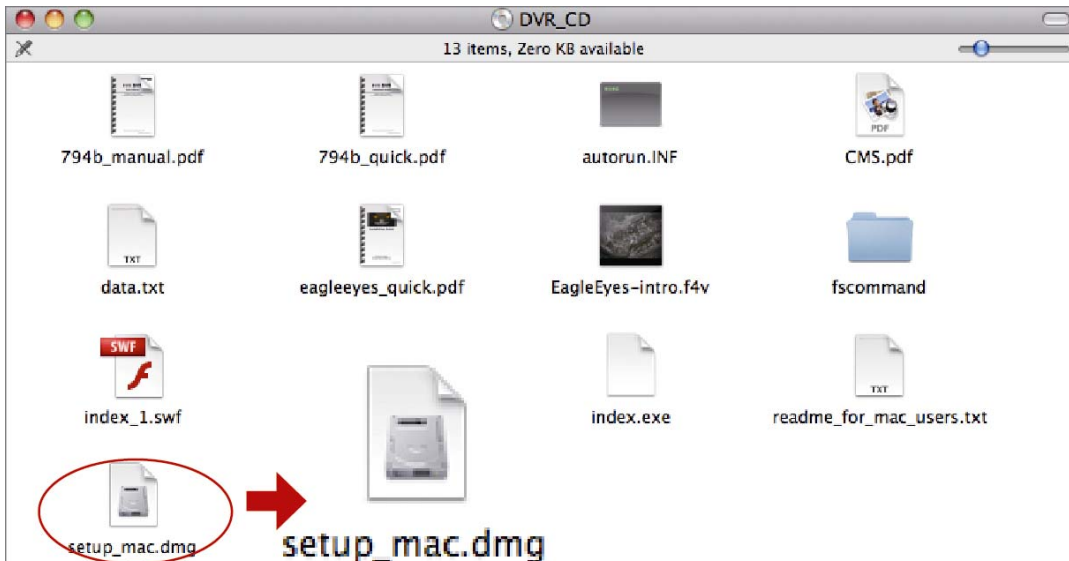

### 2.1 Install the Software

#### 2.1.1 Download from the supplied CD

Step 1: Place the supplied CD into your CD-ROM or DVD-ROM drive and you will see CD/ DVD icon (circled in red in the picture below) shown on the desktop. Click on the icon to view the disk content.

Step 2: When disk content are shown, double-click on setup exe to install Video Viewer software.

Step 3: Drag the Video Viewer icon to your applications folder to start setting up.

Follow the above instructions to finish the installation. When the installation is completed, a shortcut icon

will be placed on your PC desktop and Applications list (circled in red).

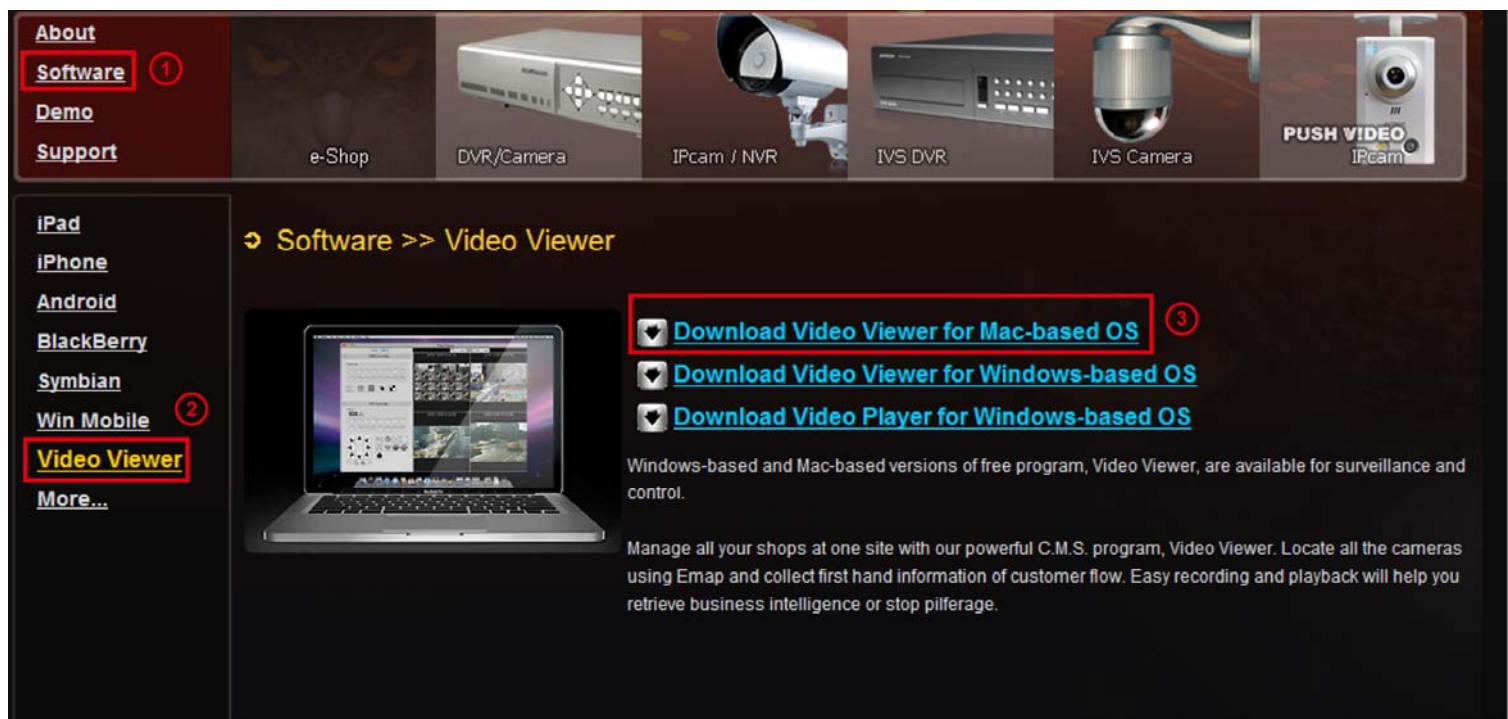

## 2.1.2 Download from the Internet

Step 1: On the condition that your MAC is connected to the Internet, please register with our website, [www.eagleeyesccv.com](http://www.eagleeyesccv.com) and go to the support page to download Video Viewer.

Step 2: Follow the on-screen instructions to finish the installation. When the installation is completed, a

shortcut icon  will be placed on your PC desktop and Applications list

## 3. CONTROL PANEL & FREQUENTLY-USED FUNCTIONS

### 3.1 Accessing the Device

Step 1: Double-click "" on your PC desktop to open Video Viewer.

Step 2: Click "" to select the IP address of the device you intend to connect, and double-click it.

Step 3: The setup page view is displayed in the Video Viewer.

### 3.2 Setup Page

#### 3.2.1 Setup Page Overview

Please check the functions below before setting up a new device. To know how to configure the address book and add a new device, please refer to

3.2.3 Configure the Address Book at page 7 and For more details, please refer to 3.2.4 Add a Device at page 7.

### 3.2.2 Setup Page Main Button Overview

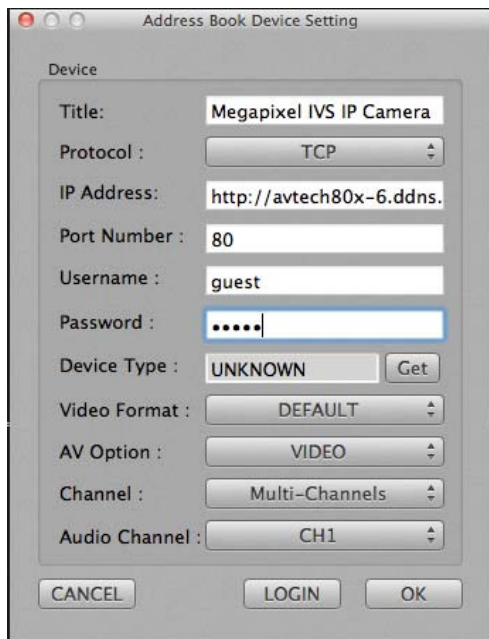

Function	Button	Description
<b>Address Book</b>		
Add		Click to add one IP address for login. Key in the access information needed, and click "OK" and "Login". For details, please refer to "3.2.3 Configure the Address Book" at page 7.
Remove		Remove selected device from the address book.
Edit		Select one current IP address from the address list, and click this button to modify the access information as needed.
Connect		Connect to the selected device.
Disconnect		Disconnect from the selected device.
<b>Available Devices</b>		
Add		Click to add the selected device to address book.
Edit		Select one current IP address from the address list, and click this button to modify the access information as needed.
Refresh		Click to update the available IP address list.
<b>Display mode</b>		
1-Cut Display		Click to show the 1-Cut display view.
4-Cut Display		Click to show the 4-Cut display view.
9-Cut Display		Click to show the 9-Cut display view.
16-Cut Display		Click to show the 16-Cut display view.
Full Screen		Click to show the full screen view.

### 3.2.3 Configure the Address Book

Address book is a collection of the active devices that have been used on your computer. By accessing the configuration page, users can add / edit / delete devices manually on the address book, and further search for any other available device on the local Internet. For more details, please refer to 3.2.4 Add a Device at page

Step 1: Double-click  on your PC desktop to open Video Viewer. By defaults, the “Address Book” panel will be displayed on the left side of the control panel.

Step 2: Click  (add an active device) to key in the default IP address, user name, password, port number and basic information of the DVR you intend to connect. The configuration page is shown as below:

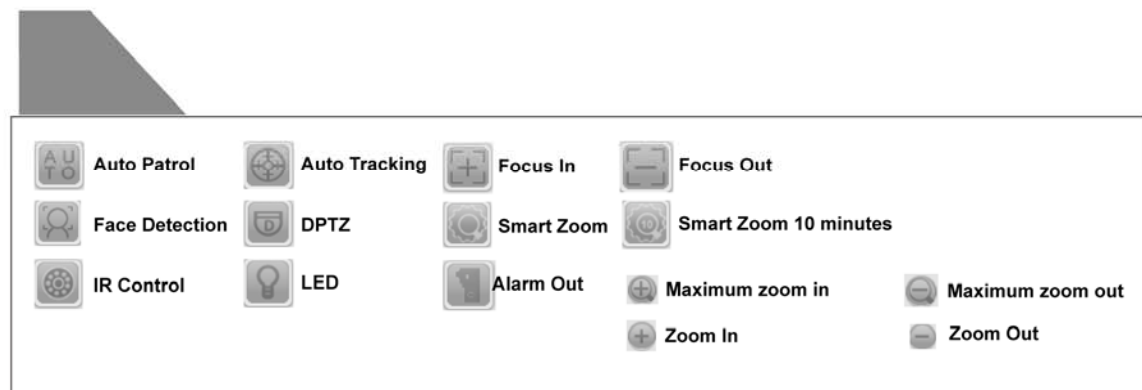

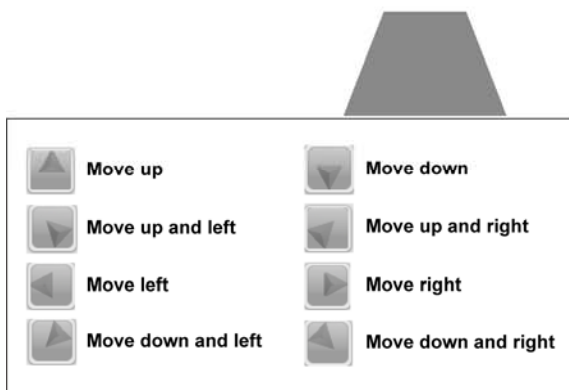

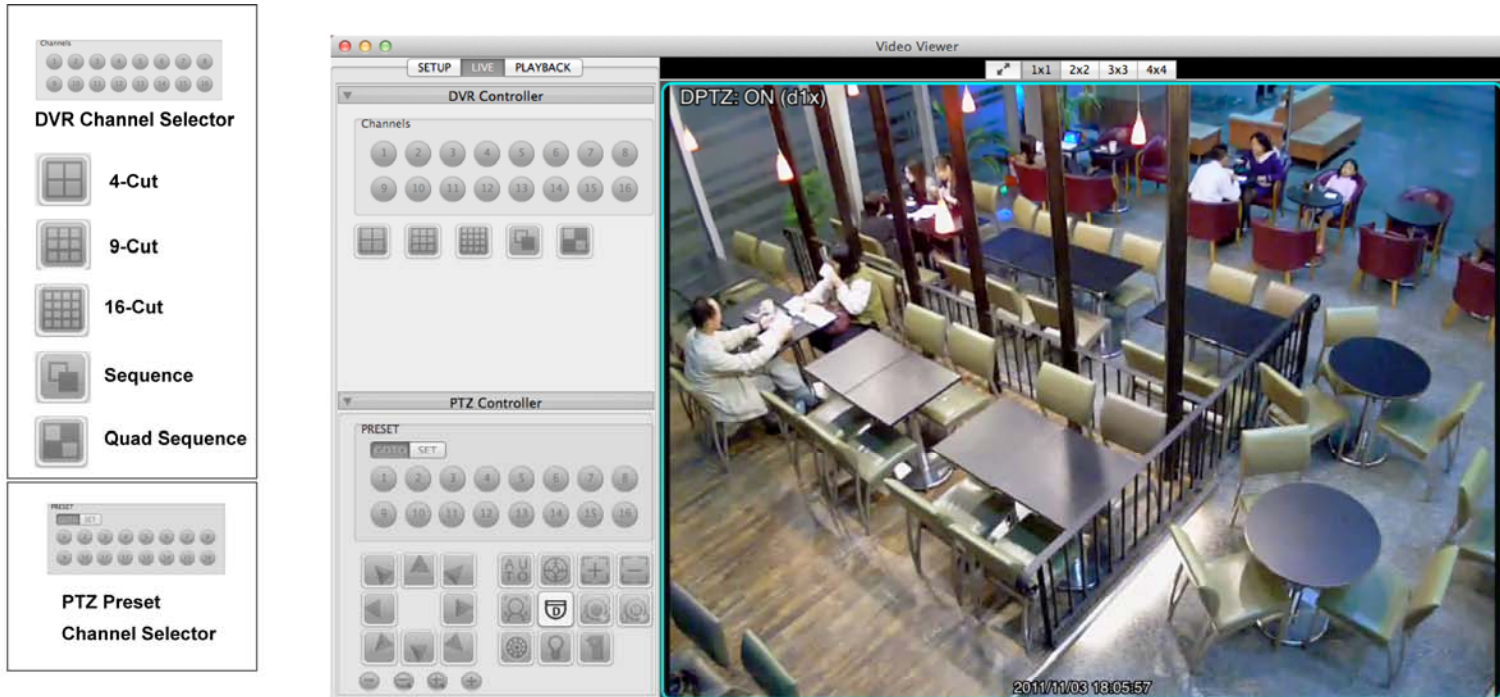

Function	Description
Title	Enter a device name for easy identification.
Protocol	TCP provides reliable, ordered delivery of a stream of bytes from a program on one computer to another program on another computer.
IP address / Port Number / User name / Password	Enter the IP address / port number / user name / password for accessing the device you want.
Device Type	Click “Get” for this software to identify the type of your device, and make sure the corresponding functions available for the device will operate normally in this software.
Video Format	Select “MPEG4”, “JPEG”, “H264” or “Default” for streaming. The available options may vary based on the device you want to access.
AV Option	Select “Video/Audio” or “Video” to ensure whether the web audio transmission is needed. <ul style="list-style-type: none"> <li>■ When your device supports web audio transmission but “Video” is selected, no audio is transmitted.</li> <li>■ When your device doesn't support web audio transmission but “Video/Audio” is selected, no audio is transmitted.</li> </ul>
Channel	Select each channel display or Multi-Channels display.
Audio Channel	Select the channel that you want to have the audio function.

Function	Description
Cancel	Click "Cancel" to discard the setting.
Login / OK	Click "OK" to save the setting and return to "Address Book" panel, or click "Login" to save the setting and directly log into the device immediately.

## 3.3 Live Page

### 3.3.1 Live Page Overview

Forward		Click once to get 2X fast forward, twice to get 4X, three times to get 8X, and four times to get 16X the highest.

### 3.5 Playback a Video

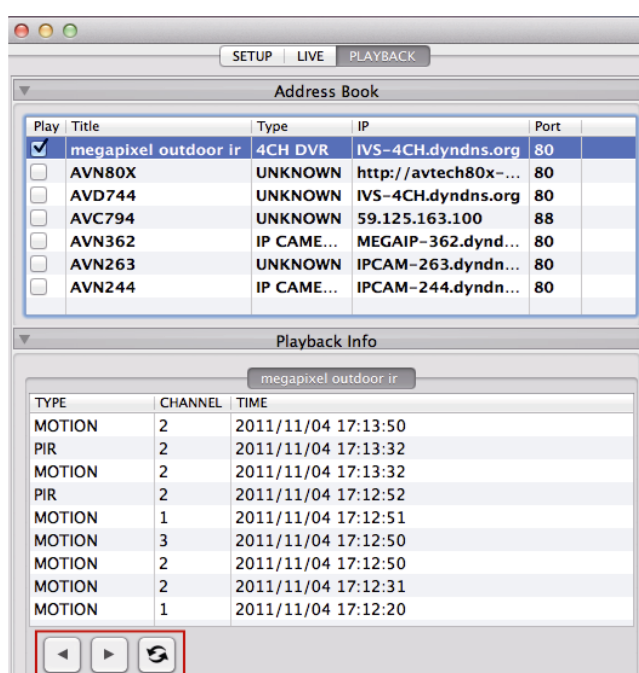

Video Viewer will start recording automatically as an event is triggered; users can sort out the video he / she intends to playback with the help of Time / Channel / Filter search.

#### Time Search

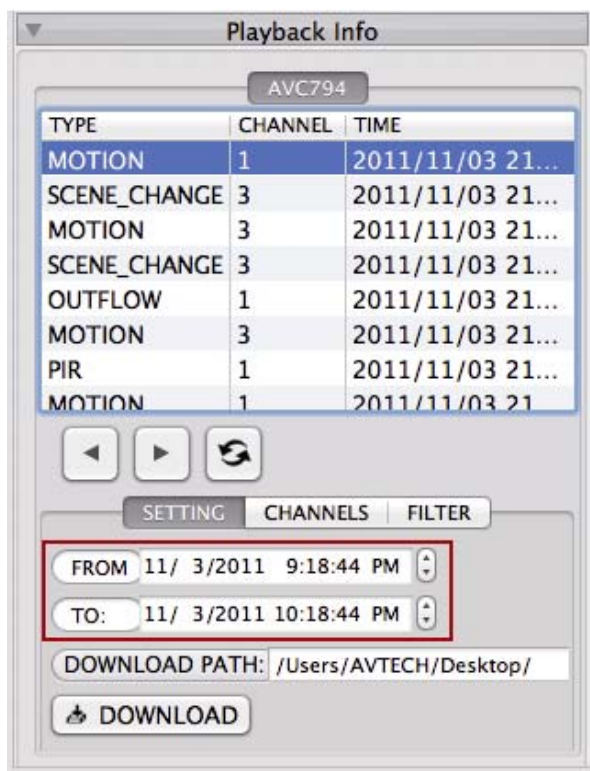

To play a recording, click “**PLAYBACK**”, and select the device you want to check from the address book. Afterwards, all playback information will be listed in chronicle order.

For the former log list, click on “” to perform backward function; meanwhile for the latter log list, click on “”.

Click on “” to refresh the log and to get the latest event list.

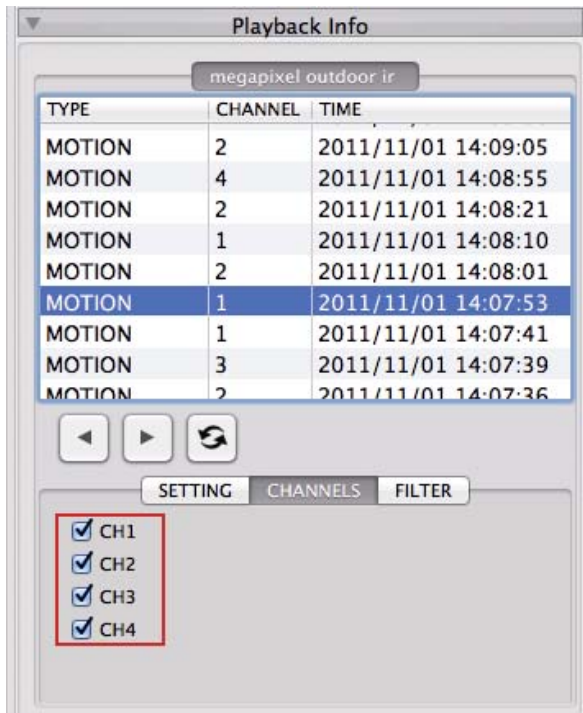

To search for a video at specific time, click “**SETTING**” to key in “FROM” and “TO” columns. Click on “” to refresh the log and to get the latest event list. As you get the video, you can use playback control to playback it immediately.

## Channel Search

To search for a video at a specific channel(s), click "CHANNELS" to select the channel(s) you need. Click on "↻" to refresh the log and to get the latest event list. As you get the video, you can use playback control to playback it immediately.

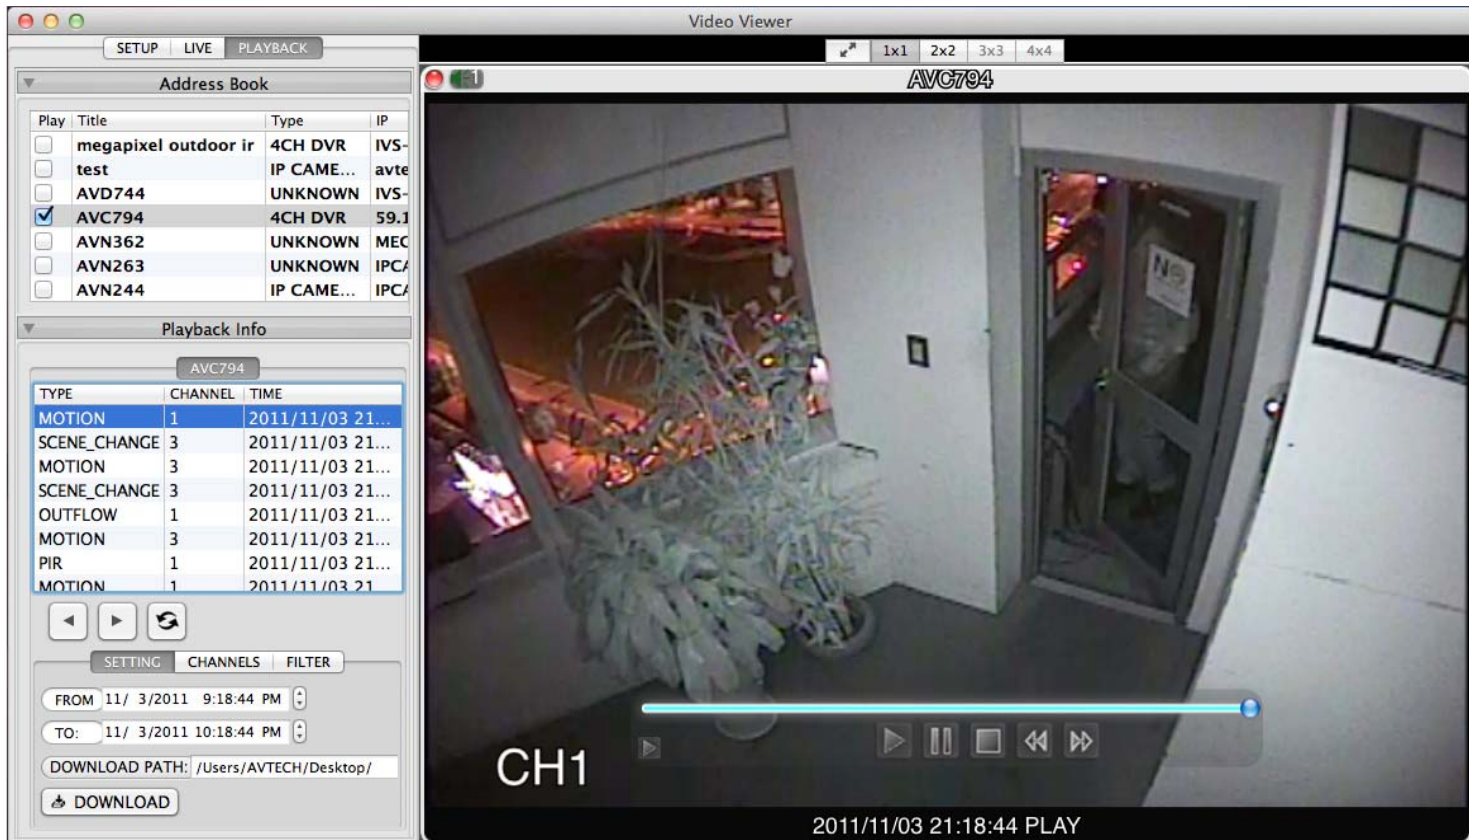

## Filter Search

To search for a specific type(s) of event video, click "FILTER" and check the items (types of event) you need. Click on "↻" to refresh the log and to get the latest event list. As you get the video, you can use playback control to playback it immediately.

### 3.6 Video Download and Backup

By the time a video is selected, choose a download path and click on “ DOWNLOAD” to download files to your PC for further storage.

Button	Function	Description
	Channel	Specify the channel(s) you need by checking or unchecking.
	Download by Time	Specify the time range within which has the video data you want in the “From” and “To” columns.
	Download by Event	<p>Select an event log from the event list. This list shows all logs in the specified DVR from the latest to the earliest.</p> <p>To quickly find the events you need, check or uncheck the event type (System / Manual / Alarm / Motion and so forth), and select the log you want.</p> <p>To view the earlier or later logs that are not shown in the current page, click “Backward” or “Forward”.</p> <ul style="list-style-type: none"> <li>To refresh the event list, click “”.</li> </ul>
	Download Path	Assign the location where the backup files are saved.
	Download	Click “Download” to start the video backup.
