

Description

7402/IP video door entry panel is a full IIP solution for the communication in residential buildings, condominiums or office buildings. Thanks to its technology and Peer2Peer facilities 7402/IP panels do not require any server on the installation. The protocol of communication is TCP/IP which makes possible to be connected to a LAN together with other IP devices in the same installation. It is very easy to upgrade any installation by adding more panels. The system doesn't become busy thanks to its multi-channel feature.

Features

- Unlimited number of entry panels.
- 2.5 mm thick stainless steel ANSI 316.
- 3,5" A grade color TFT.
- Blue backlit keypad.
- Visual information of communication process.
- Dialing code or search on the list by scroll.
- Connector RJ-45 connection.
- Standard Ethernet LAN, PoE powered.
- 100 access PIN codes, 6 digit each.
- RFID reader built-in (under request).
- Remote connection through VPN.
