### Why use Selektor 1?

Intoxication by Alcohol or Drugs can seriously compromise safety. Selektor provides a simple and effective method of random selection. Pressing the button provides a constant reminder of screening policy and an effective deterrent. The decision is made on the spot, so there are no opportunities to subvert the selection process. The Selektor provides the ideal method to put policy into practice without the ongoing management requirement or costs incurred by other selection methods.

#### Technical specifications

Weight: 300 grams including batteries  
Size: H 165mm, W 85mm, H 40mm  
Size: H 170mm, W 87mm, H 45mm (including wall bracket)  
Supply: 3 x AA batteries (supplied) or 12 volt DC

**Selektor 1** is ideal for use to implement random screening for alcohol and drugs

#### How it works

- Everyone passing through the control point pushes the button
- A red or blue light with tones indicate that you have been selected
- A green light and a low tone indicates that you have not been selected on this occasion
- When they know they could be stopped, they won't take the risk!
